Our **primary short-term plan** is to assist Abaco and Grand Bahama evacuees who are making/have made their way to the island of Eleuthera. In the **mid- to long-term**, we will be working with NEMA and our partners to help rebuild and repair homes in the affected areas and assist other folks in getting resettled. As we can see from the early evidence, the recovery from Dorian will be a 5-10 year process for many.

With this in mind, one of the best ways for folks in the States to assist is through financial support. [Click here](#) to make a donation. Look for "Hurricane Dorian Relief Fund."

Thanks in advance for your support. Needless to say, the needs are great as many of our Bahamian friends are suffering.
